

Here you will find **important information** for journalists about NameRobot at a glance.

What is NameRobot?

NameRobot is an online portal which helps users **invent and check new names**. The software is of interest to anyone looking for a name for business use.

These include company names, product names and brand names, as well as names for projects and domains. NameRobot is also an ideal working companion and for agencies, creatives and consultants who deal with business **naming** professionally.

NameRobot guides anyone looking for a new name through the **name-finding process** step by step - from the first idea to comprehensive name checks.
